About Me

Architect with a strong passion for innovative and sustainable design. Experienced in planning, designing, and overseeing construction projects across residential, commercial, and public sectors. Dedicated to delivering creative solutions that balance aesthetics, functionality, and environmental responsibility. A strong team player with excellent communication and project management skills.

Education

BHI University 2020-2025

Higher Institute of Engineering and Technology
Beheira

GPA: 2.052

Work Experiences

Graduation Project C+ 2024-2025

Commercial Center in New Cairo

- Designed a large-scale commercial center aimed at serving the growing urban population of New Cairo, focusing on accessibility, functionality, and user experience.
- The project includes retail units, restaurants, entertainment areas, a hypermarket, and designated spaces for children.
- Emphasized modern architectural language with dynamic forms and efficient circulation to enhance both commercial value and visitor comfort.
- Conducted site analysis and selected a strategic location to meet market demand and ensure urban integration.
- Applied sustainable design principles, natural lighting, and spatial zoning to optimize environmental and economic performance.
- Prepared comprehensive architectural drawings and visual presentations using AutoCAD, Revit, and 3D modeling tools.

Work Experiences

Retail Clothing Shop Design

Tomy Store

2023-2024

- Designed a modern retail clothing store with a focus on user flow, product visibility, and contemporary aesthetics.
- Developed floor plans, ceiling layout, and detailed elevations at multiple scales (1:100 and 1:50).
- Created realistic 3D renderings to visualize spatial organization, materiality, and lighting concepts.
- Implemented a soft color scheme and custom furniture units to enhance brand identity and customer experience.
- Integrated display zones, circulation paths, and visual focal points to maximize commercial efficiency.
- Used AutoCAD, Revit, and rendering software to develop architectural drawings and presentations.

Project Design

2023-2024

Entertainment Administrative Complex

- Participated in the architectural design of an entertainment and administrative complex.
- Produced complete architectural drawings including site plan, floor plans (ground + upper levels), sections, elevations, and detailed 3D perspectives.
- Integrated sustainable design elements and functional zoning.
- Conducted site analysis and contributed to the structural system proposal.
- Delivered final presentation boards using AutoCAD, Revit, Photoshop, and Lumion.

Motel in the New City of El Alamein

2022-2023

- Designed a modern motel facility with a focus on user comfort, circulation, and outdoor integration.
- Prepared complete architectural drawings including site plan, ground floor plan, typical floor plans, sections, elevations, and 3D renderings.
- Conducted site analysis and proposed a suitable structural system for hospitality functionality.
- Created 3D visualizations and presentation boards using AutoCAD, Revit, Photoshop, and Lumion.
